

## FXX ERROR MESSAGE

If you receive this error message when trying to clear the IT file, please do not delete the transaction. You will not be able to re-release the transaction. This error is designed to alert users to a situation where the transaction has posted to the financial tables and remains on the IT file in edit mode "3". Edit mode 3 generally results from transactions entered in edit mode "0" or "1" that contain errors. A software problem placed edit mode "3" on these transactions instead of edit mode "4". A data fix is planned for next week to put the proper edit mode on the transactions. PLEASE DO NOT DELETE THESE TRANSACTIONS!
